## Solar Heat for Industrial Process

### Food and Agro Industries commitment in Renewables

SHIP2FAIR aims to foster the integration of solar heat in industrial processes of the agro-food industry.

#### FLAGSHIP SITES

SHIP2FAIR develops and demonstrates, at four real industrial sites (demosites), a set of tools and methods to manage the whole life-cycle of integration of solar heat in industrial processes.

#### SIMPLE SOLUTIONS

##### The Replication Tool

A software to support the concept design of SHIP projects and the development of techno-economic feasibility studies, combining both data from solar generation and process features.

##### The Control Tool

An online Decision Support System to optimize the management of process heating systems through a live monitoring oriented approach.

#### WINNING FORMULA

New business lines  
Solar thermal technologies  
Renewable energy integration  
Market uptake
